SHADE TREES

These shade trees are dug Bare Root and burlapped into a Peat Ball. A polyethylene plastic cover will be put over this ball to keep it moist. They can stand upon the ground this way during the planting season without watering until sold. Then when planting, the polyethylene cover must be removed. This tree is now in A-1 condition for planting.

If a dirt ball is desired, there will be an extra charge of \$1.00 each for trees up to 2" caliper. Over 2" caliper, there will be a \$2.00 charge each.
